Immunisations: Primary Health Information Development Unit, Social Health Atlas of Australia: Local Government Areas; Compiled based on data provided by Australian Childhood Immunisation Register, Medicare Australia, 2021
Emergency department encounters: Department of Health and Human Services, Health Central Data Warehouse, Tasmania. Analysed by Primary Health Tasmania; accessed November 2023

*Individual totals may be higher due to patients potentially visiting more than one practice outside an LGA area or possible de-identification linkage errors from patient administration extraction software.

Health outcomes

Public hospital admissions

During the five years from 2018-2019 to 2022-2023 there were 5,922 admissions to Tasmanian public hospitals from the Glamorgan Spring Bay LGA, with 3,171 overnight stays.

NUMBER OF PUBLIC HOSPITAL ADMISSIONS BY AGE GROUP AND GENDER 2018-19 TO 2022-23

TOP 10 PRIMARY HOSPITAL DIAGNOSIS*^	TOP 10 CHARLSON COMORBIDITIES^^	TOP 10 POTENTIALLY PREVENTABLE HOSPITALISATIONS
Other cataract	Any malignancy, including lymphoma and leukaemia, except malignant neoplasm of skin	Diabetes complications
Pain in throat and chest	Renal disease	Chronic obstructive pulmonary disease
Care involving dialysis	Cerebrovascular disease	Type 2 diabetes
Abdominal and pelvic pain	Chronic pulmonary disease	Cellulitis
Atrial fibrillation and flutter	Diabetes with chronic complication	Congestive heart failure
Myelodysplastic syndromes	Myocardial infarction	Urinary tract infections
Recurrent depressive disorder	Metastatic tumour	Iron deficiency anaemia
Liveborn infants according to place of birth	Congestive heart failure	Type 1 diabetes
Other anaemias	Dementia	Convulsions epilepsy
Other symptoms and signs involving the digestive system and abdomen	Diabetes without chronic complication	Angina

*Excludes diagnoses coded as “persons encountering health services in other circumstances” and “other medical care” which cover a wide range of diverse categories and are as such less useful in understanding reasons for hospitalisations.

Health outcomes

^The *primary hospital diagnosis* is the diagnosis established after study (for example, at the completion of the episode of care) to be chiefly responsible for causing the episode of admitted patient care. It is essentially the main reason someone needed to be admitted to hospital.

^^Patients admitted to hospital often have other comorbid conditions, which may or may not be related to their diagnosis. *The Charlson Comorbidities Index* classifies 17 comorbid conditions which may influence mortality risk.

Causes of death

During 2017-2021 coronary heart disease (10%), lung cancer (8%), dementia including Alzheimer disease (7%), cerebrovascular disease (7%) and chronic obstructive pulmonary disease (5%), were the leading causes of the 269 deaths in the Glamorgan Spring Bay LGA. The age standardised death rate in 2021 was 559.8 compared with the overall aged standardised rate of 636.7 for Tasmania.
